13/03/2014

To Parents and Carers of Pupils in Years 5 and 6,

It has been brought to my attention that a number of pupils in Years 5 and 6 have set up Facebook Accounts and communicate with each other in this way.

At Whitley Park Primary and Nursery School we are committed to promoting the safe and responsible use of the Internet and as such we feel it is our responsibility to raise this particular issue as a concern. Websites such as Facebook offer amazing communication and social connections, however they are created with their audience in mind and it is not possible to control or verify the content.

With this in mind I attach an advice sheet for parents in order to inform you about the potential risks of this form of communication for young people and urge you to consider carefully whether or not to allow your children to have their own personal accounts online.

It should be noted that Facebook's terms and conditions state that all users must be 13 years or older. If we become aware of any problems relating to the safety or wellbeing of our pupils connected to Facebook use we take action by reporting under aged profiles.

Thank you for your co-operation in this matter, by continuing to work together we can ensure that the safety of our children is at the heart of what we do particularly in these quickly changing technological times.

Yours sincerely

Karen Salter  
Head teacher

**Facebook's terms and conditions state that all users must be 13 years or older and as such we strongly recommend that parents do not allow their children to have their own personal accounts online.**

Possible risks for children under 13 using Facebook may include:

- Facebook use 'age targeted' advertising and your child could be exposed to adverts of a sexual or other inappropriate nature
- Children may accept friend requests from people they don't know in real life which could increase the risk of inappropriate contact or behaviour
- Language, games, applications, groups and content posted or shared on Facebook is not moderated, and therefore can be offensive, illegal or unsuitable for children
- Photographs shared by users are not moderated and therefore children could be exposed to inappropriate images or even post their own
- Underage users might be less likely to keep their identities private and lying about their age can expose them to further risks regarding privacy settings and inappropriate behaviour
- Facebook cannot and does not verify its members therefore it is important to remember that if your child can lie about who they are online, so can anyone else!

We feel it important to point out to parents the risks of underage use of such sites, so you can make an informed decision as to whether to allow your child to have a profile or not. The profiles will have been created away from school and sometimes by a child, their friends, siblings or even parents. **We will take action (such as reporting under aged profiles) if a problem comes to our attention that involves the safety or wellbeing of any of our children.** It is also important that parents/carers are aware that whilst filtering tools or parental controls are very useful in keeping children safe online, they are not always effective and children may still access unsuitable content. However, if you should decide to allow your child to have a Facebook profile we strongly advise you to be aware of the potential risks exposed to your child. You may want to consider the following points:

- Check their profile is set to private and that only approved friends can see information that is posted
- Closely monitor your child's use and talk to them about safe and appropriate online behaviour such as not sharing personal information, clicking onto unknown links, installing applications and not posting offensive messages or photos
- Ask them to install the CEOP (Child Exploitation and Online Protection Centre) application on [www.facebook.com/clickceop](http://www.facebook.com/clickceop) on their profile
- Set up your own profile so you can understand how the site works and ask them to have you as a friend on their profile so you know what they are posting online. Have a look at the advice for parents/carers from Facebook [www.facebook.com/help/?safety=parents](http://www.facebook.com/help/?safety=parents)
- Make sure your child understands the following rules:
- Always keep your profile private and never accept friends you don't know in real life
- Never post anything online which could reveal your identity or anything you wouldn't want your parents to see
- Only click on links that you trust and always ask an adult first if you are not sure
- Never agree to meet somebody you only know online without telling a trusted adult
- Always tell an adult you trust if you feel threatened, see something that makes you feel worried or someone upsets you online

There are other social websites more suited to primary age children that are regulated and moderated such as SuperClubs Plus. We recommend that all parents/carers visit CEOPs Think U Know website for more information and keeping your child safe online [www.thinkuknow.co.uk](http://www.thinkuknow.co.uk). Further advice and information can also be found at [www.kent.gov.uk/esafety](http://www.kent.gov.uk/esafety) and [www.kent.police.uk/internetsafety](http://www.kent.police.uk/internetsafety)
